

# KEY EVENT: ADAMA WORKSHOP

**JUNE 14TH 2022, ADAMA, ETHIOPIA** - To strengthen collaboration at different levels and communicate project achievements for wider adoption and policy influence, a National Stakeholder Workshop was held.

## JOINT REFLECTION AND LEARNING PROVIDES CRITICAL INSIGHTS FOR EFFECTIVE ADAPTIVE MANAGEMENT:

**What is/are your take home messages/key points from this workshop?**

**What should be done in the future or phase 2 of the project?**

**GROUP 1:**  
Local Level  
(Woreda and Community)

- Scaling the practice
- Sustainability
- Law enforcement tools needed (bylaw on free-grazing, firewood collection in area enclosures)

- Expansion of IGA
- Expansion of forage development

**GROUP 2:**  
National and Regional Level

- Experience sharing
- Database (data collection)
- Stakeholder collaboration

- Conduct impact assessments (environment, social and economic)
- Prepare package of best practices

**GROUP 3:**  
NGOs

- FMNR as an easier possible option for land restoration than conventional tree planting
- Livelihoods should continue to be diversified
- VFTs as an effective approach for scaling
- Working more with Government stakeholders

- Realistic planning on project resources and targets
- More focus and investment on land restoration and value chains
- Sustainable energy sources (cook stoves, Biogas) need to be included
- Including physical soil and water conservation activities
- Greater incentives for the VFTs

### Workshop Objectives

- Share regreening lessons and best practices to stakeholders at the national, regional, and local level
- To assess/identify opportunities to scale up best practices and establish policy support
- Strengthen partnership with decision makers to intensify scaling at large

Improved fallow system
