

# THE REGREENING AFRICA APP

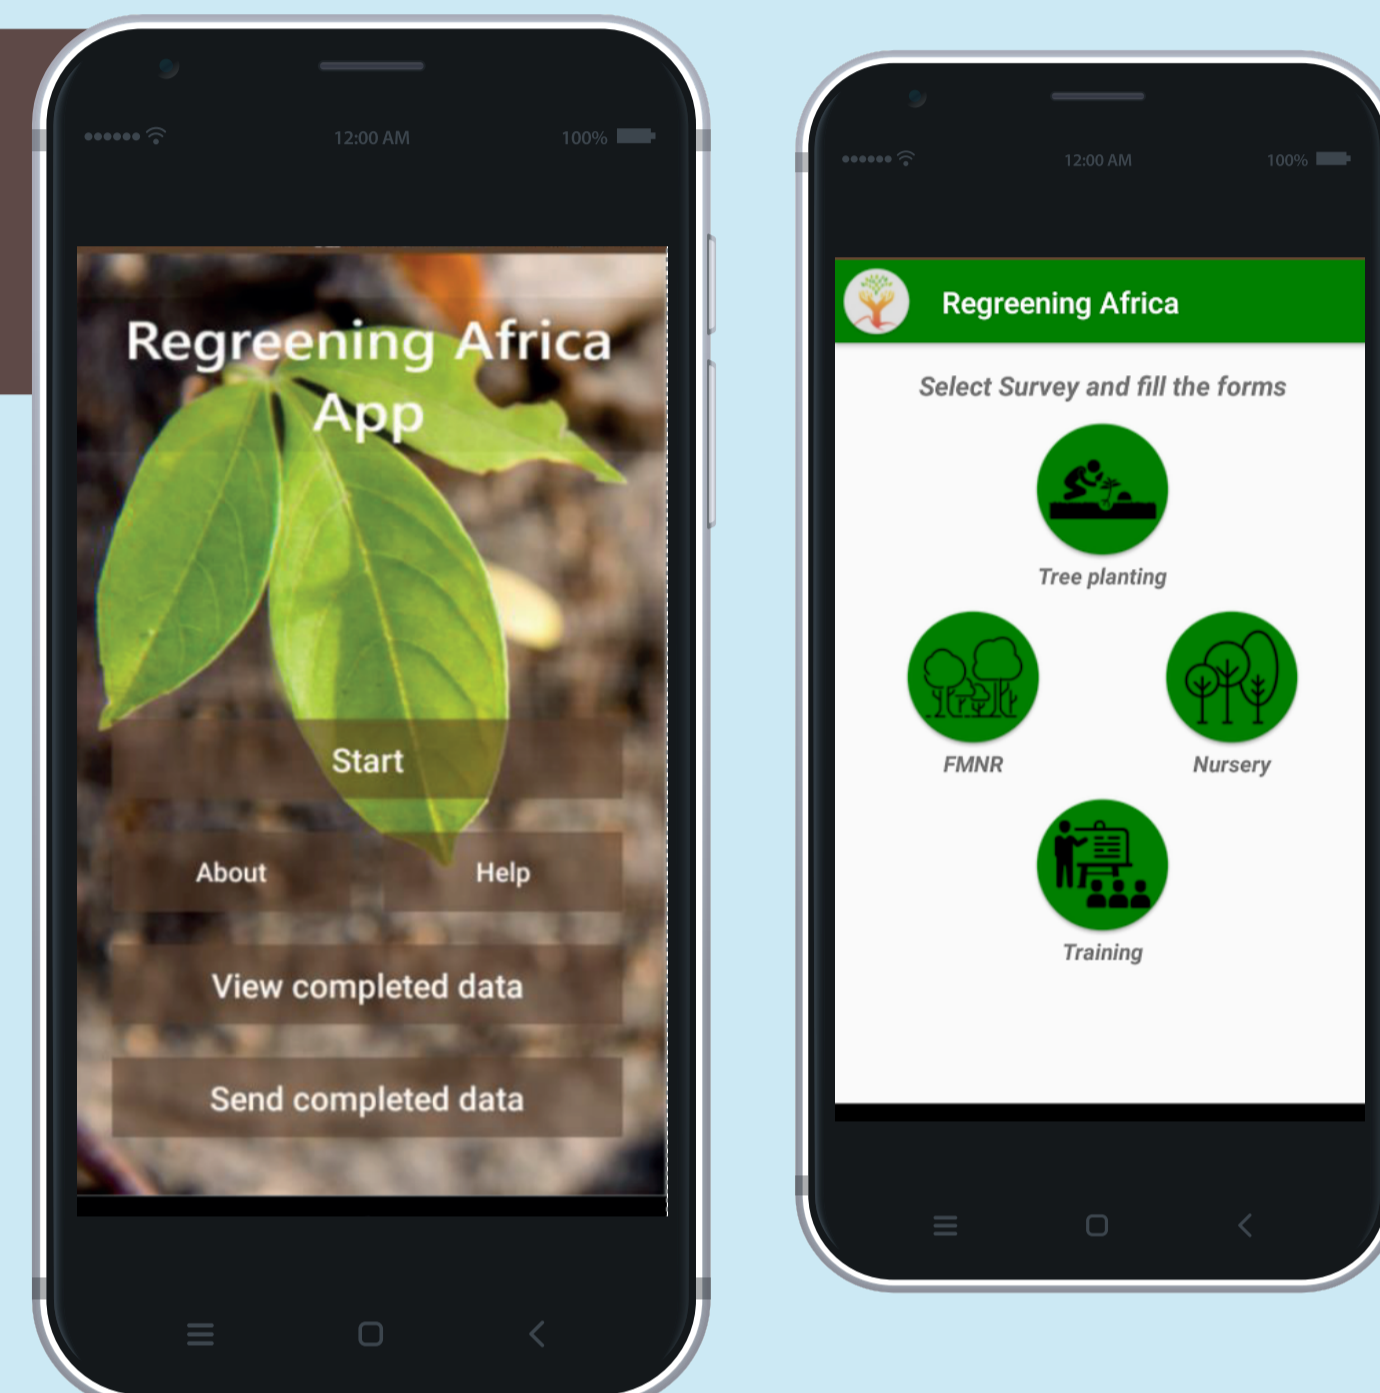

## Citizen Science for Tracking Land Restoration

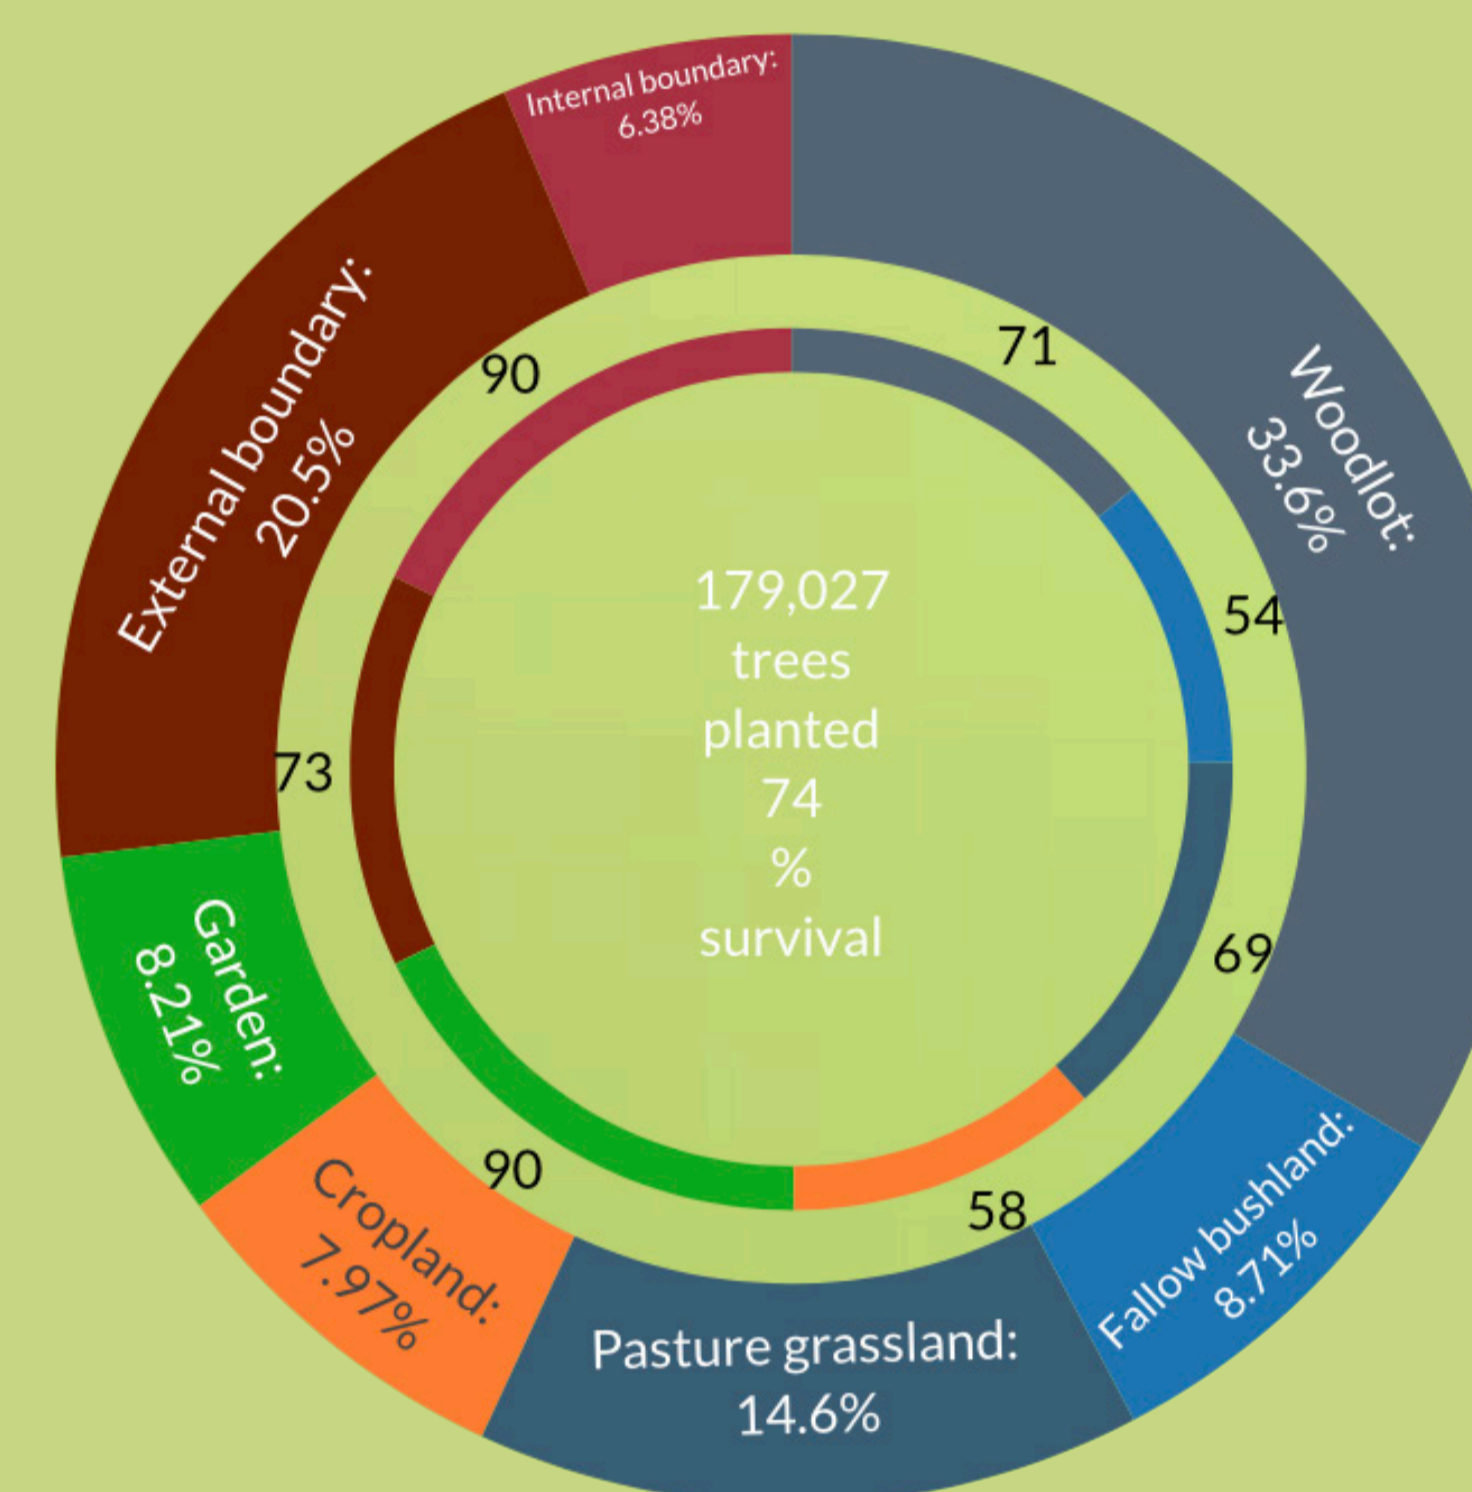

The Regreening Africa App is a free mobile-based Android application designed and developed by World Agroforestry (ICRAF), to help partners and users collect information on how farmers are managing and protecting trees on their farms.

### Regreening Africa App has four modules

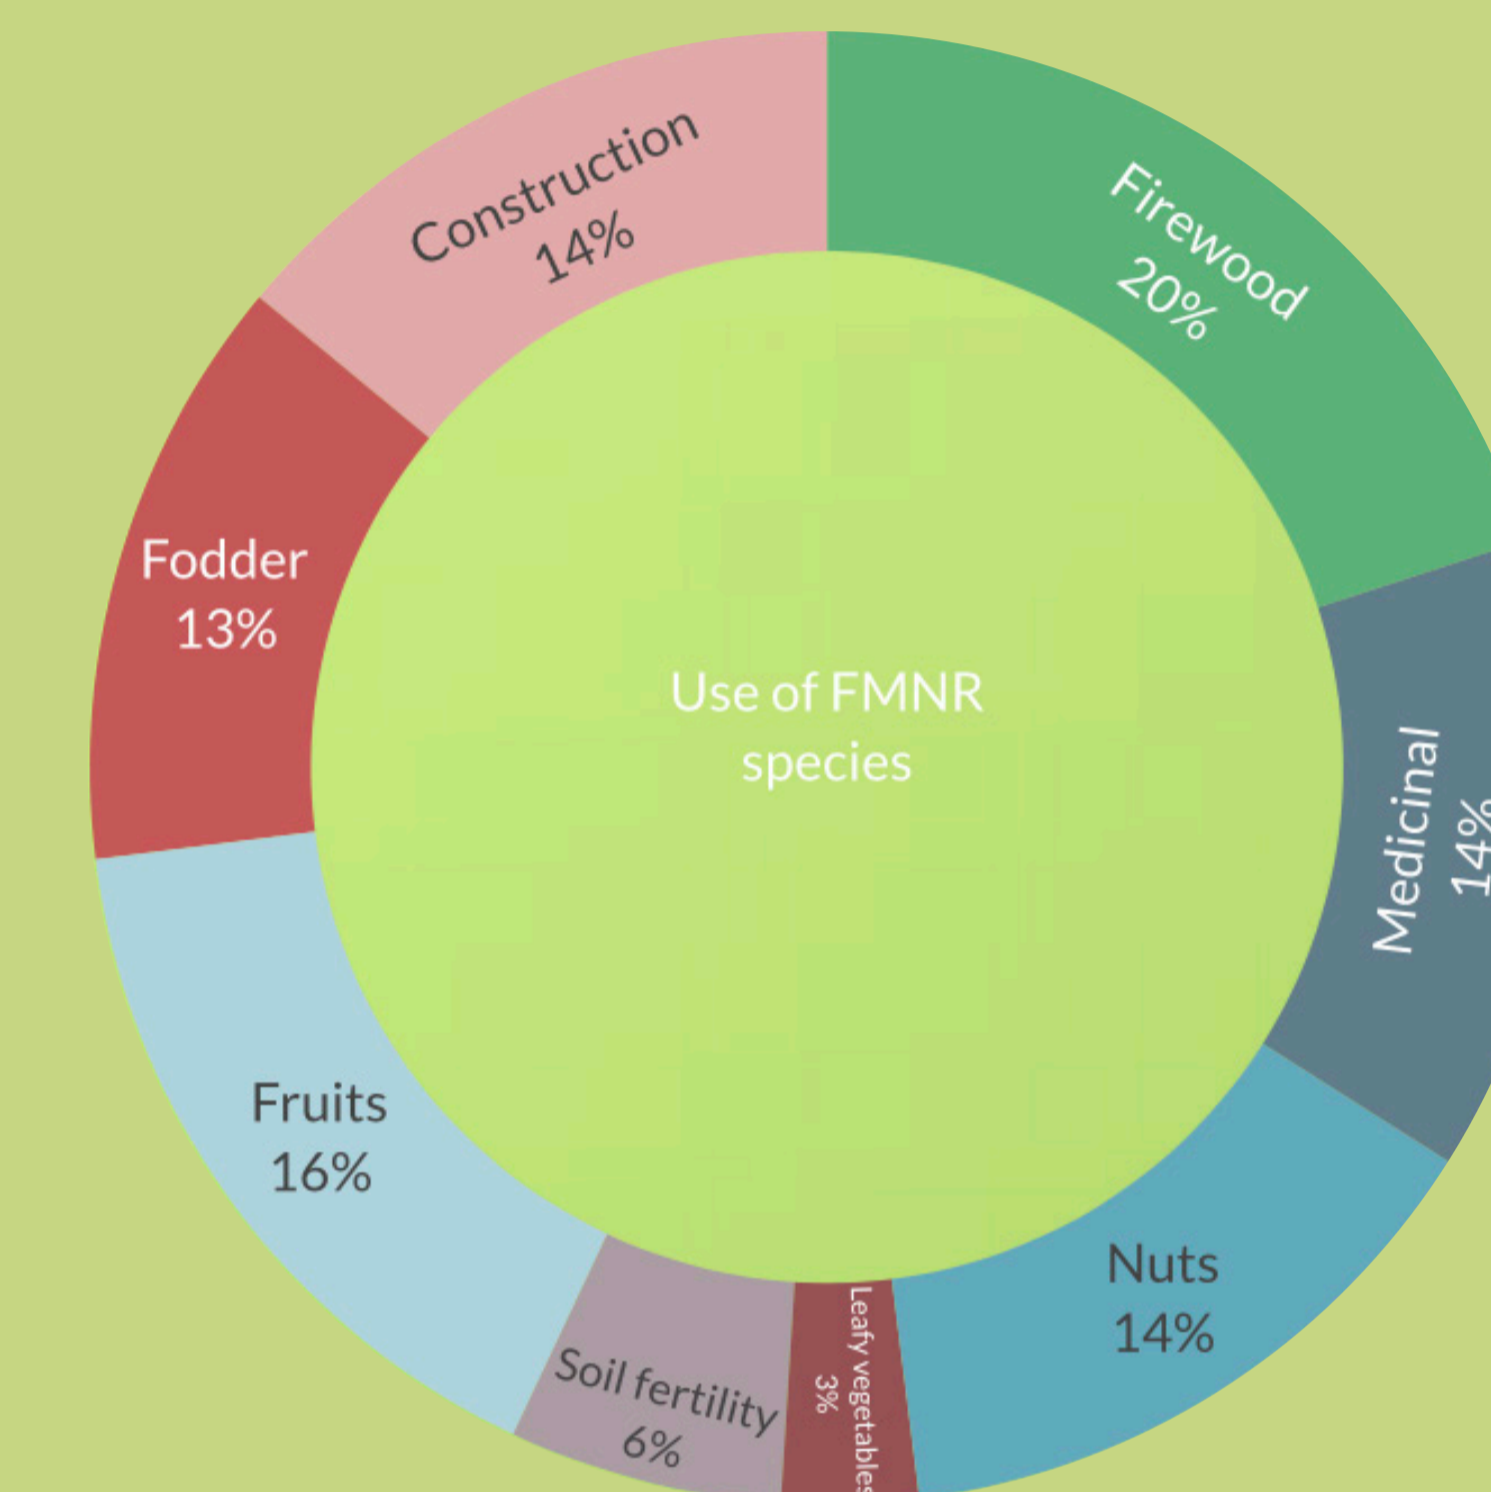

- TREE PLANTING MODULE**
- FARMER MANAGED NATURAL REGENERATION (FMNR) MODULE**
- NURSERY MODULE**
- TRAINING MODULE**

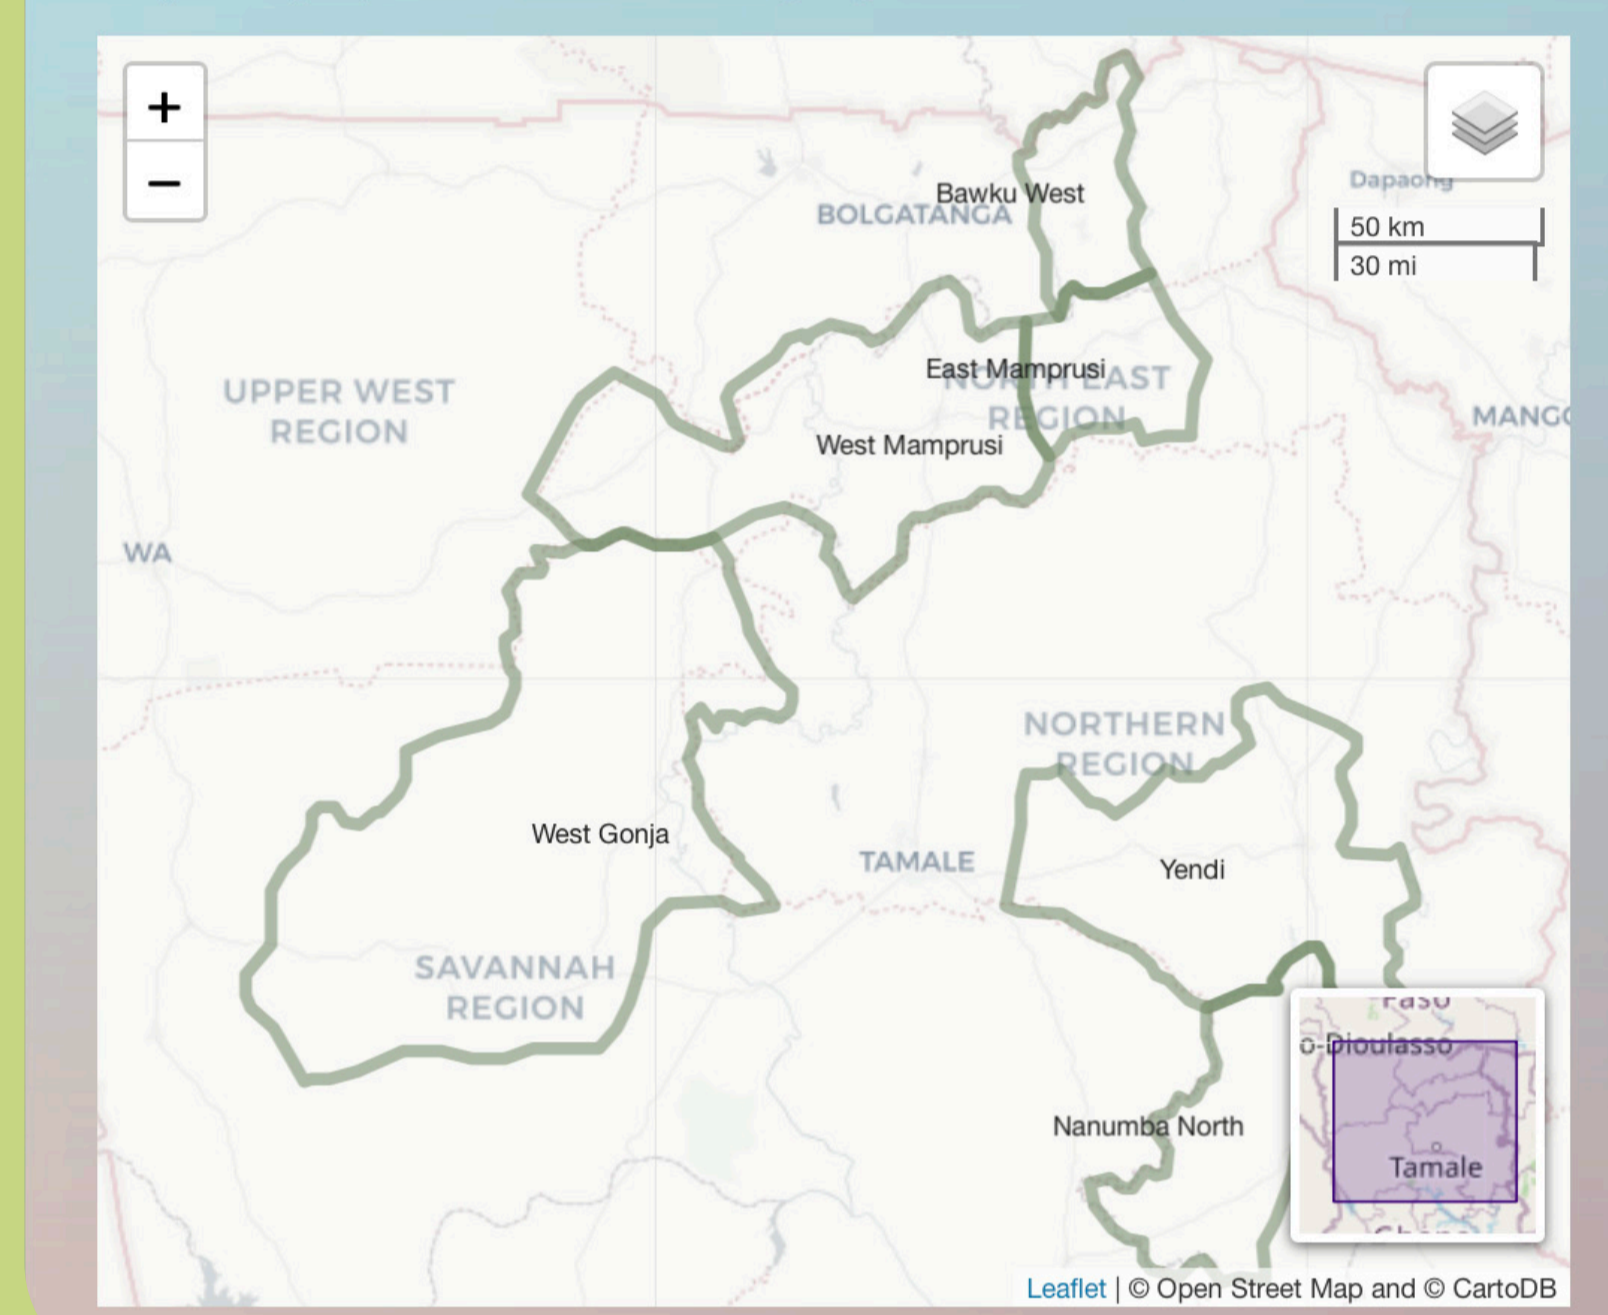

### LOCATION OF TREES PLANTED

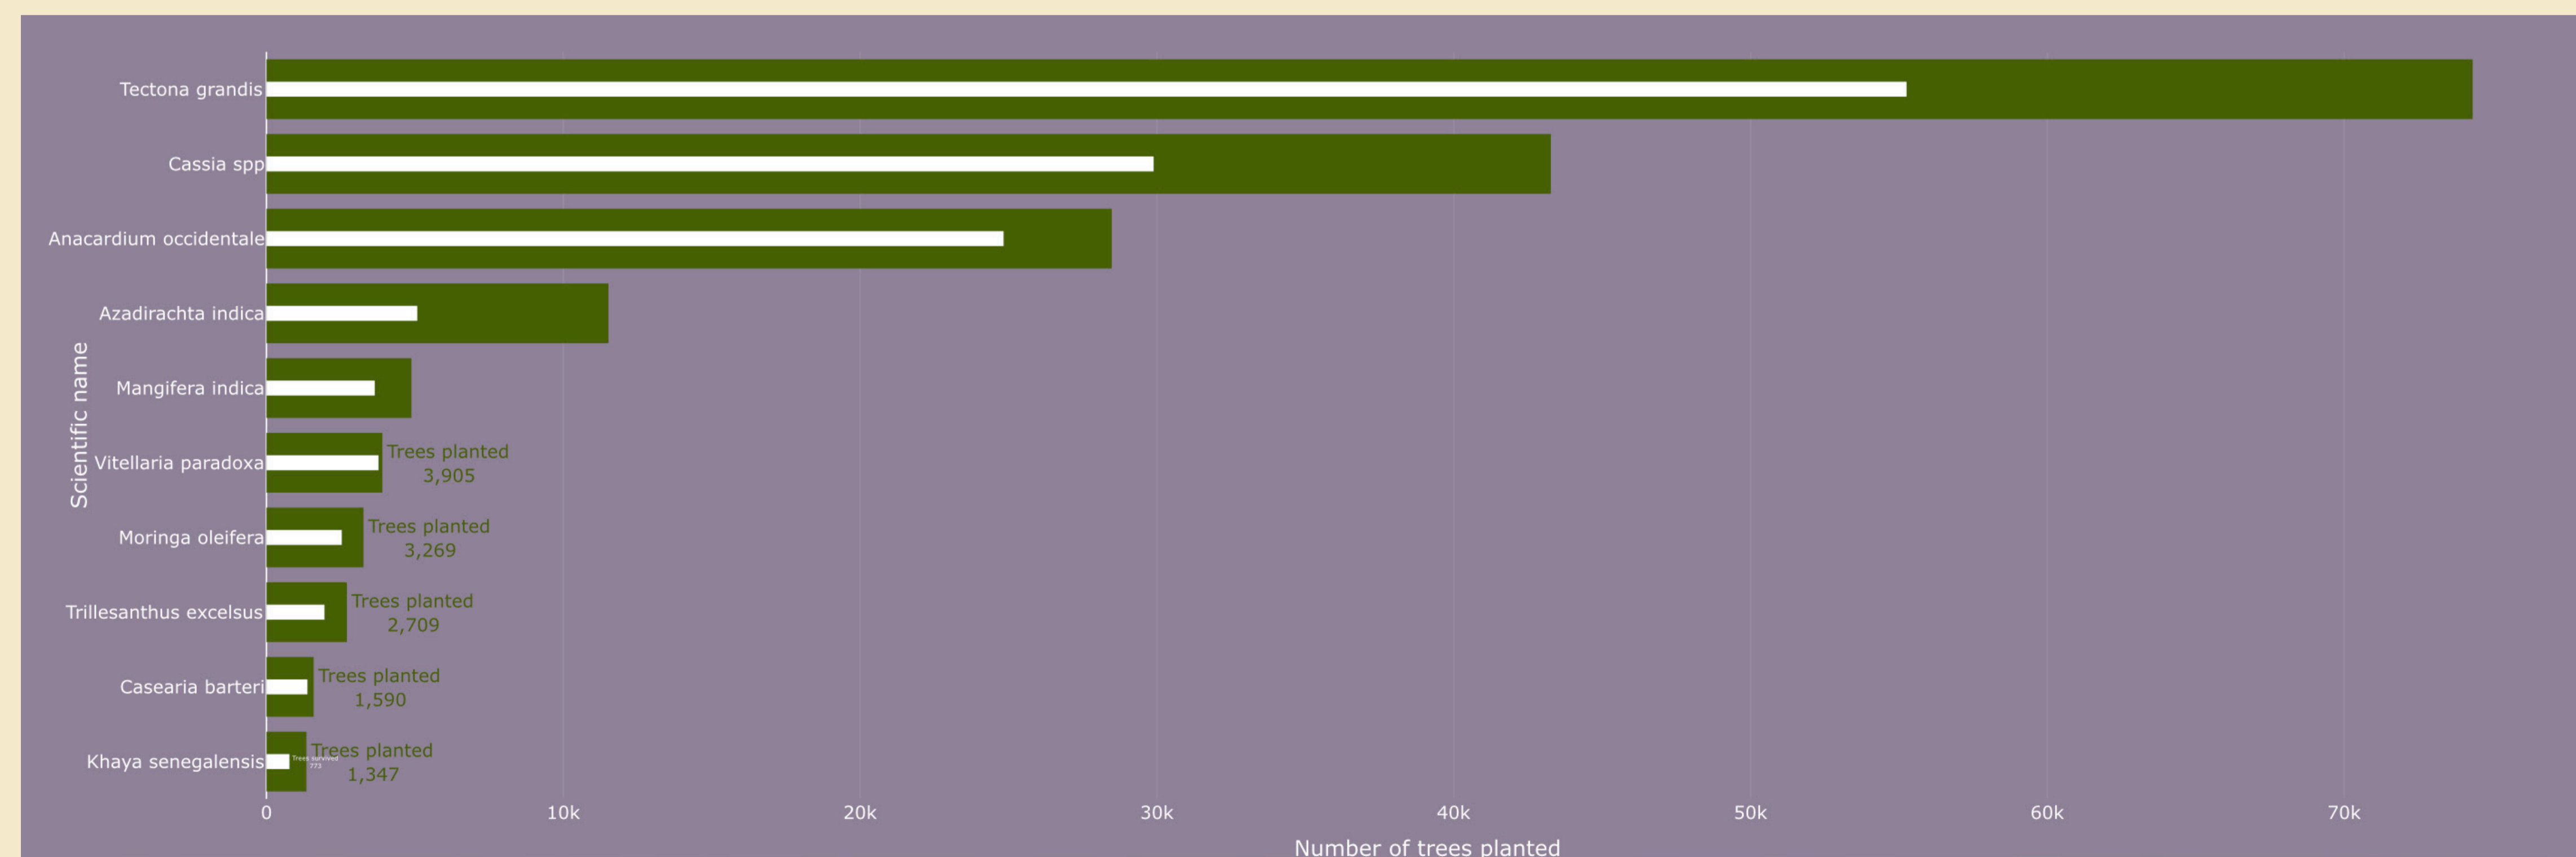

### USE OF TREES PROTECTED BY FARMERS

Map with project areas/districts highlighted

### MAIN SPECIES IN TREE PLANTING

### NUMBER OF TREES PER HOUSEHOLD
