

# MAIN SUCCESSES

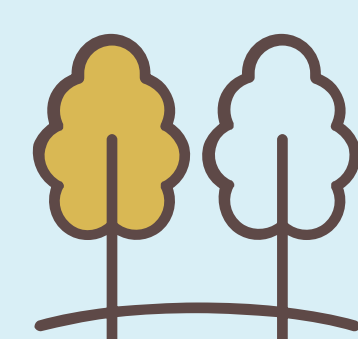

Restoration practices have reached over **200,000 hectares** of land

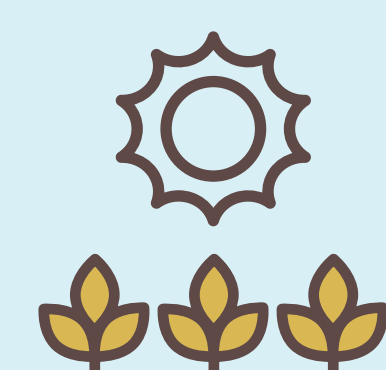

Over **45,000 households** have taken up restoration activities

**11,920 lead farmers** and fire volunteers were trained in **FMNR and bushfire management** across program sites

**17,550 farmers** have benefited from **conservation agriculture** and **compost training**

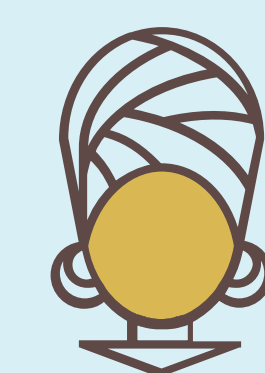

**100+ communal FMNR fields** across the program sites have been established, accounting for over **10,000 hectares**

Over **200,000 seedlings planted** cumulatively over the last 5 years across program sites

**Business plans** for one strategic actor were developed in each district to promote the shea value chain

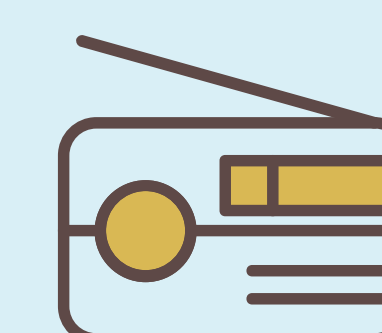

The program have worked towards **gender and financial inclusion** by introducing S4T interventions to 6,500 beneficiaries (87% female) in the Bawku West and Tempene District

Regreening Africa supported the establishment of **Environmental Management Committees** at the district level to support the implementation of environmental by-laws and advise on environmental issues. 40 communities have established by-laws in the Bawku West and Garu Tempene districts

Regreening Africa has proved critical support to the development of the **Northern Ghana Restoration Initiative**

**Radio Communication** and **visibility campaigns** reached thousands, spreading messages of Regreening practices and sustainable land management
