

# THE REGREENING AFRICA APP

## Citizen Science for Tracking Land Restoration

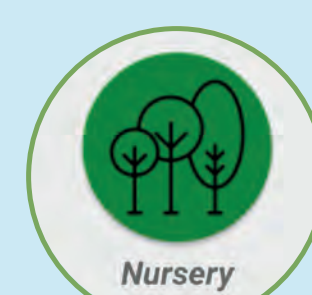

The Regreening Africa App is a free mobile- based Android application designed and developed by World Agroforestry (ICRAF), to help partners and users collect information on how farmers are managing and protecting trees on their farms.

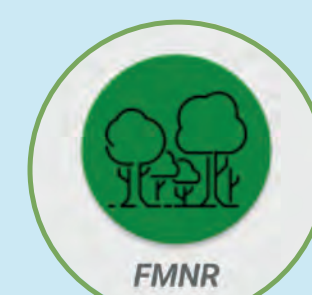

## Regreening Africa App has four modules

### TREE PLANTING MODULE

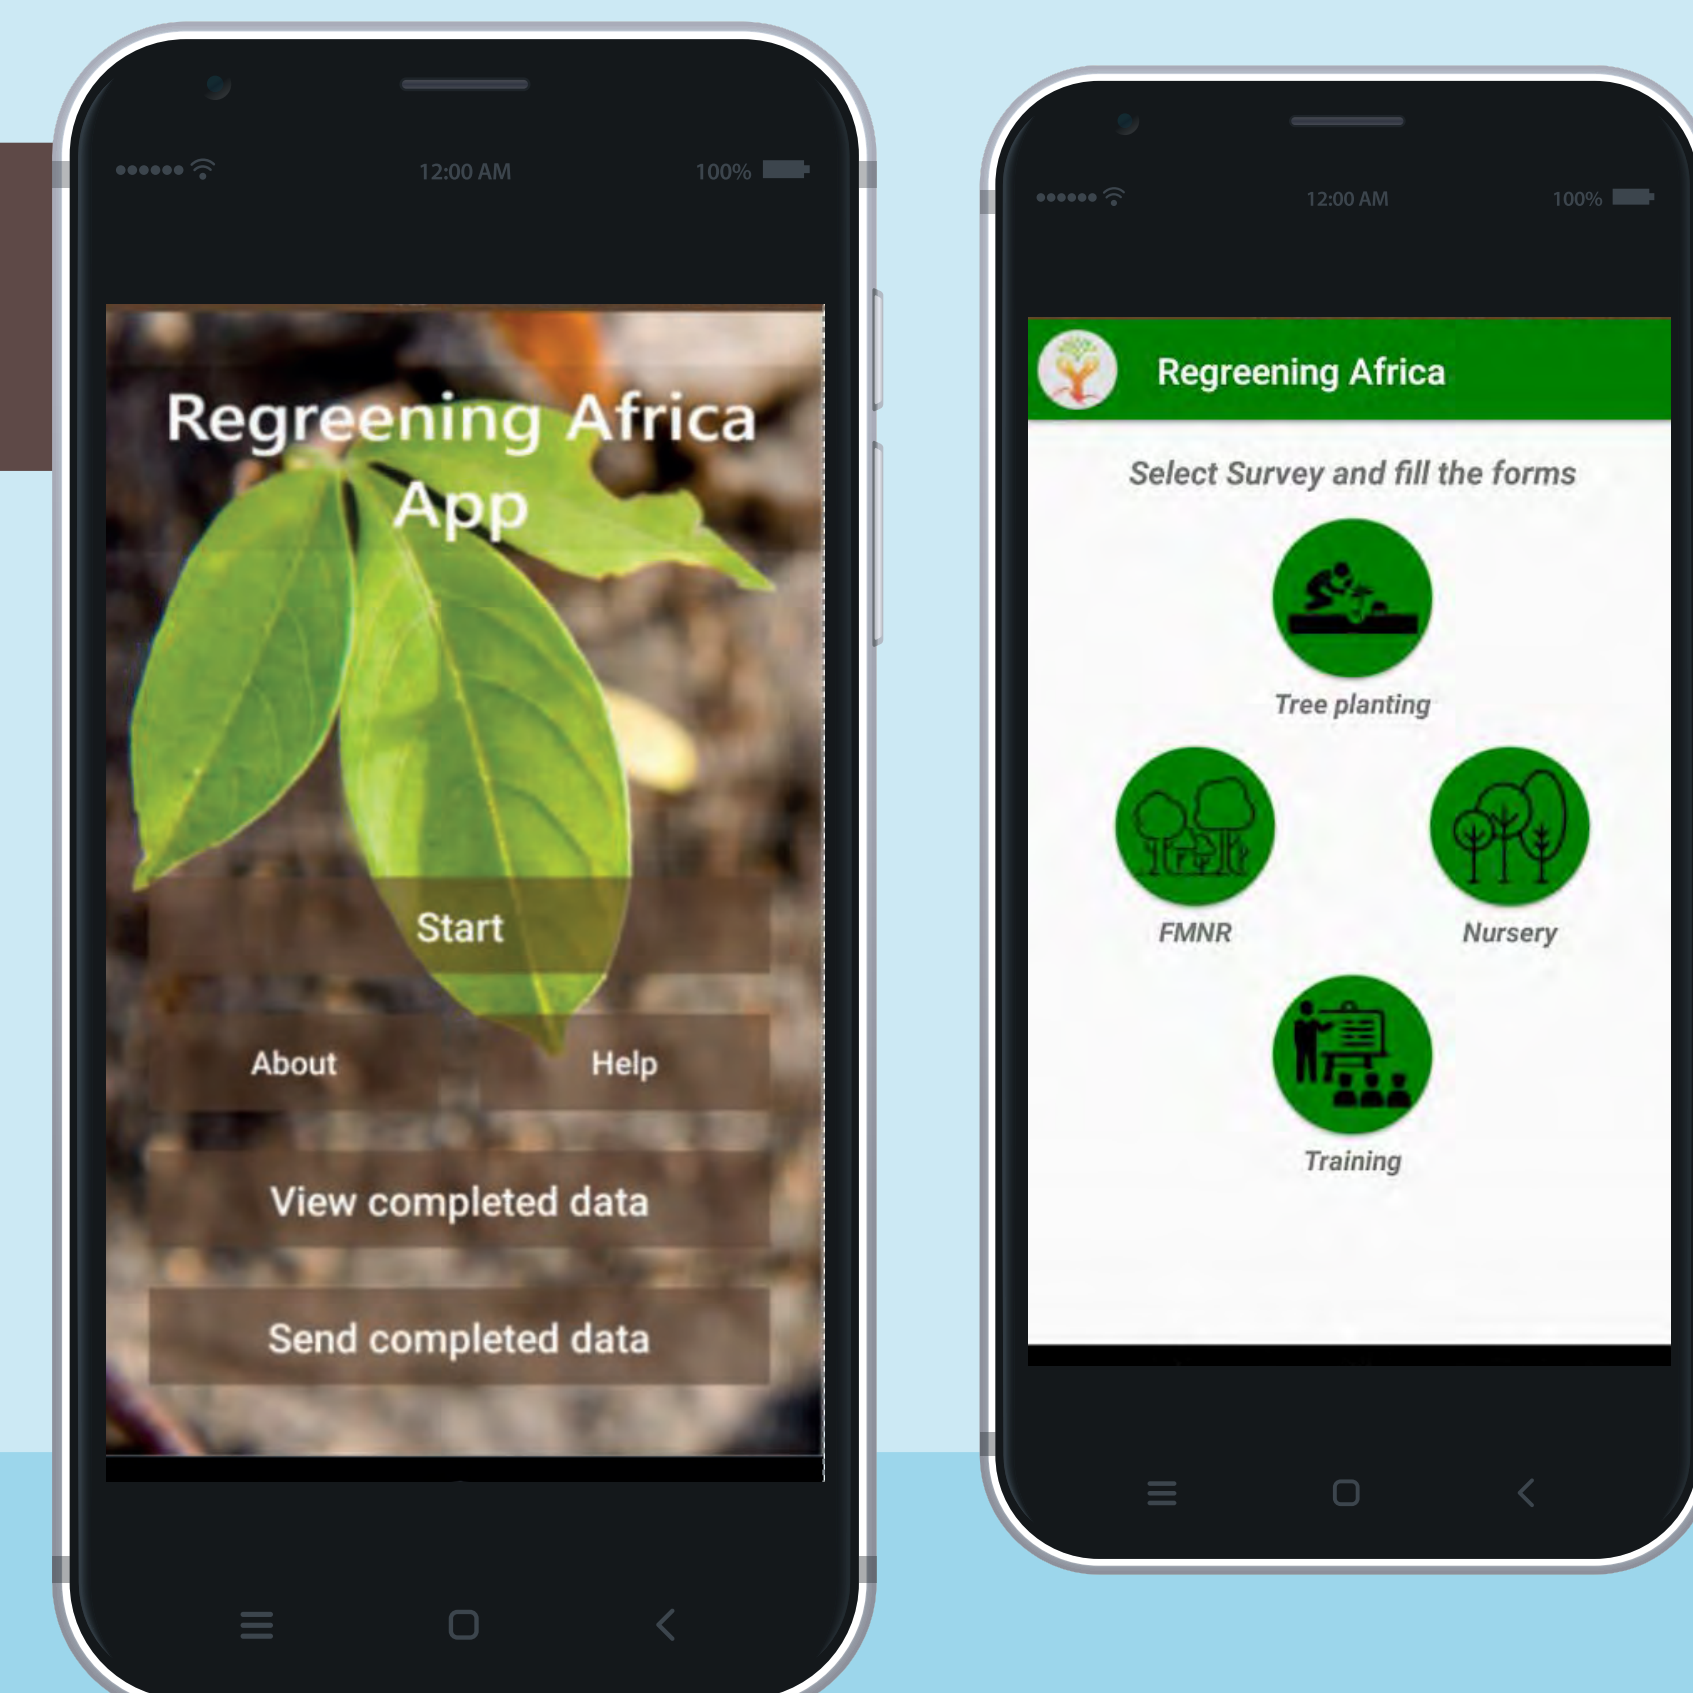

### NURSERY MODULE

### FARMER MANAGED NATURAL REGENERATION (FMNR) MODULE

### TRAINING MODULE

## MAIN SPECIES IN TREE PLANTING

Croton spp

Senna spectabilis

Eucalyptus spp

Grevillea robusta

Acacia abyssinica

Indigofera sutherlandioides

Magnifera indica

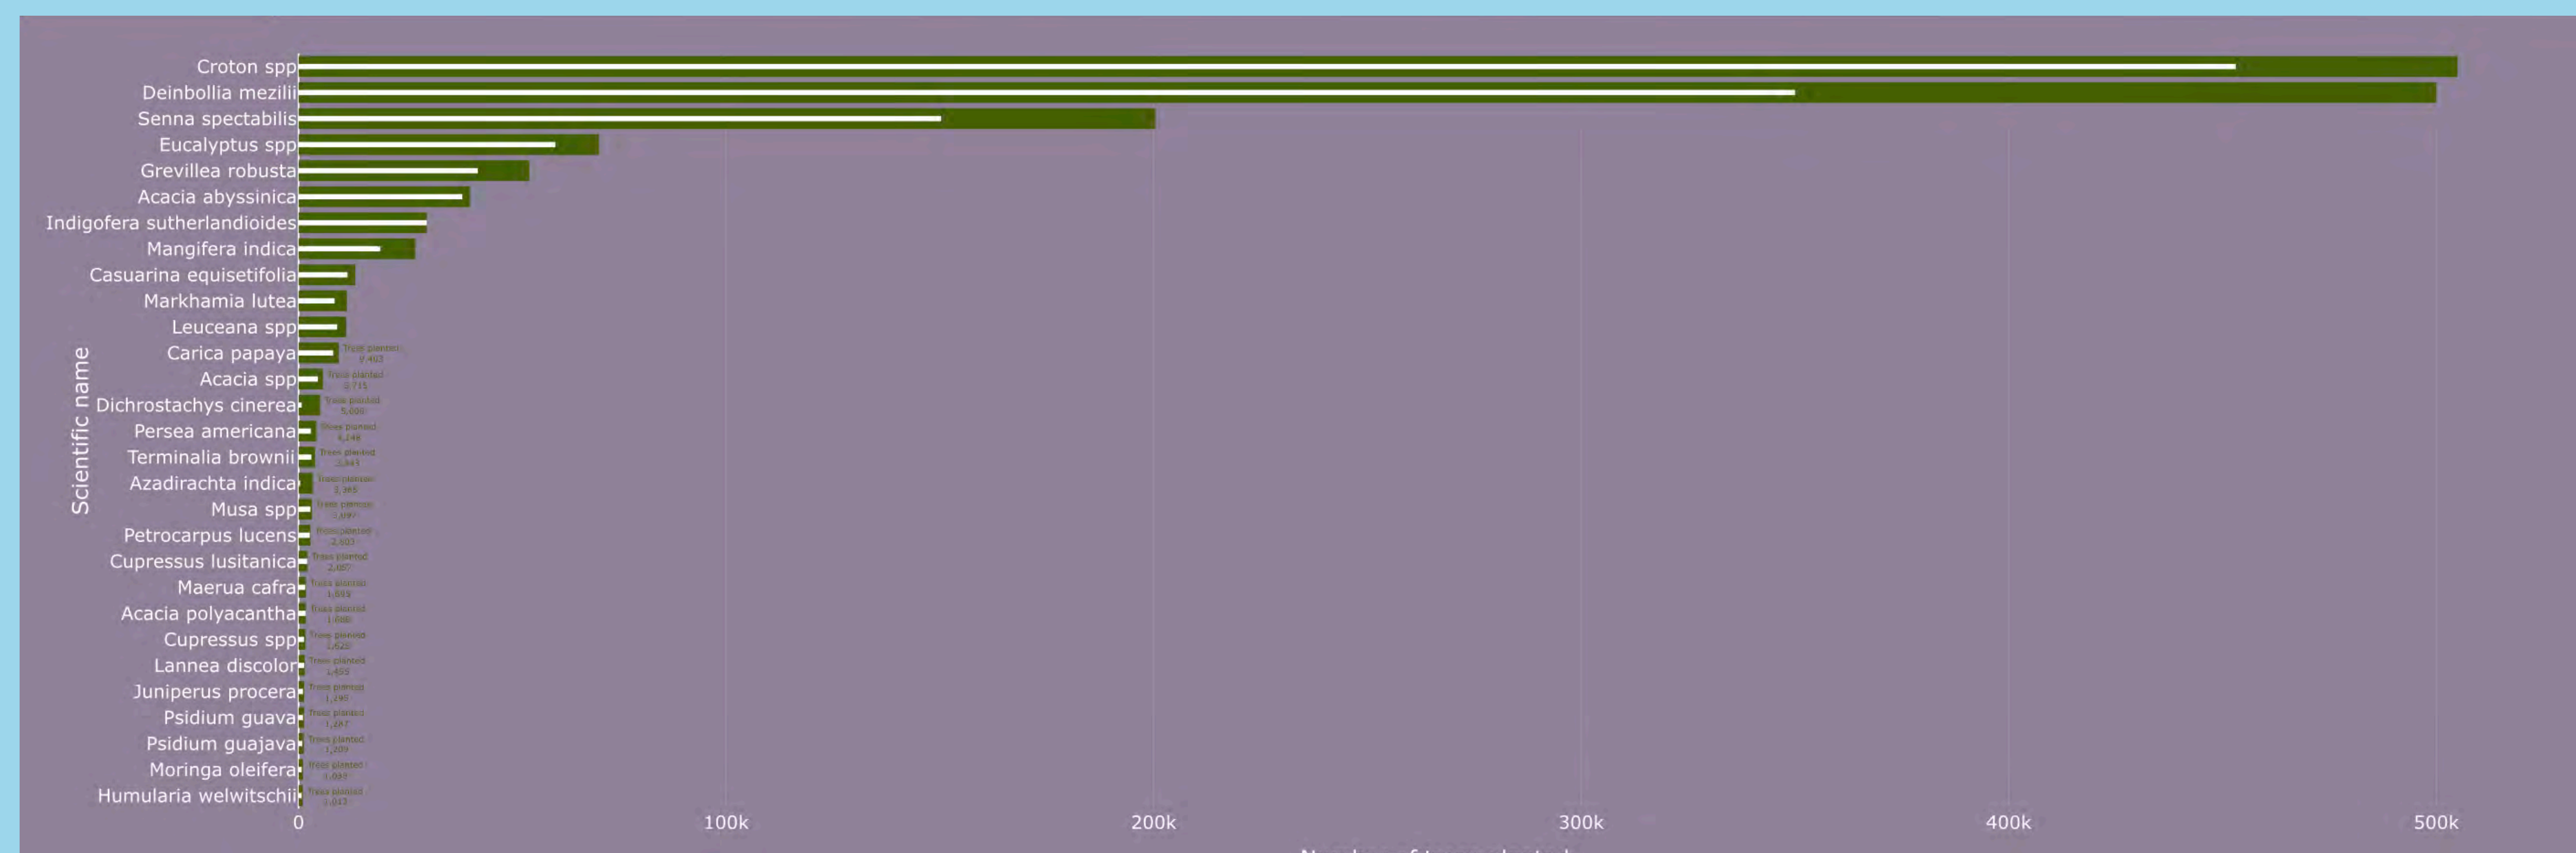

Casuarina equisetifolia

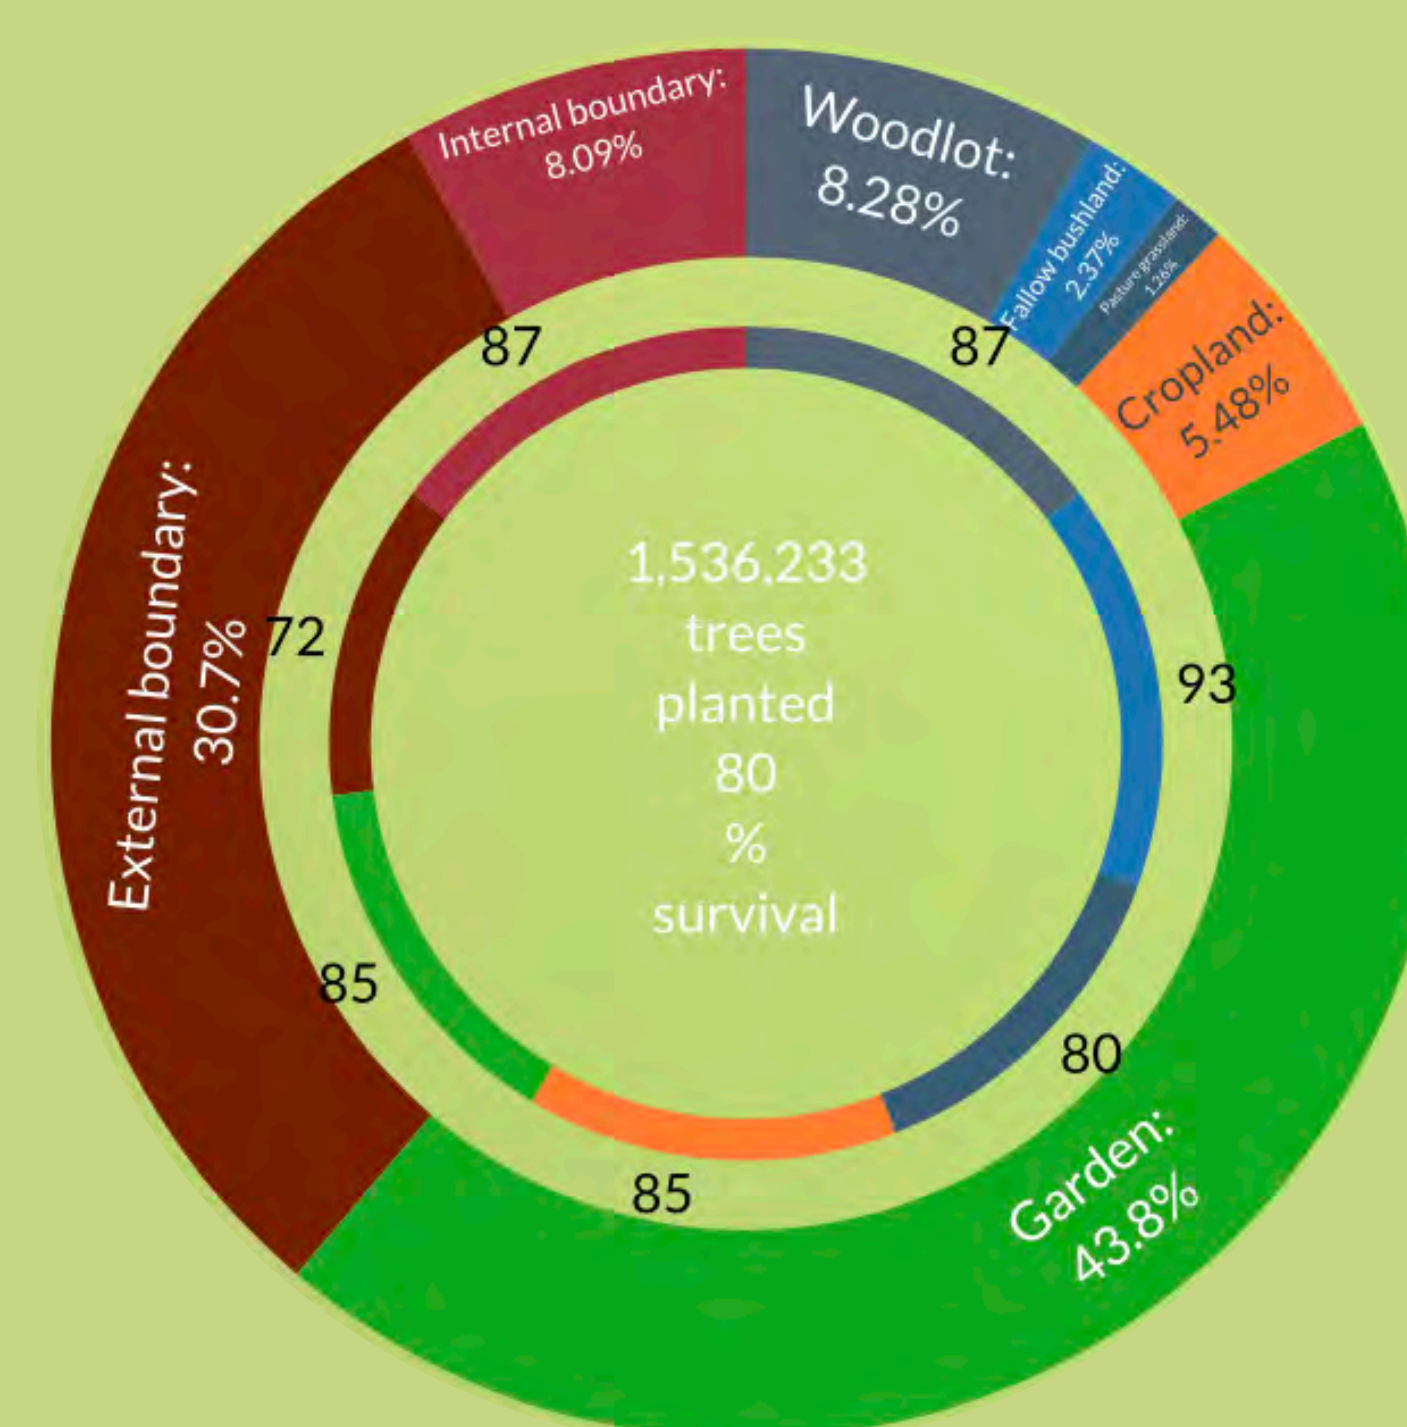

Markhamia lutea

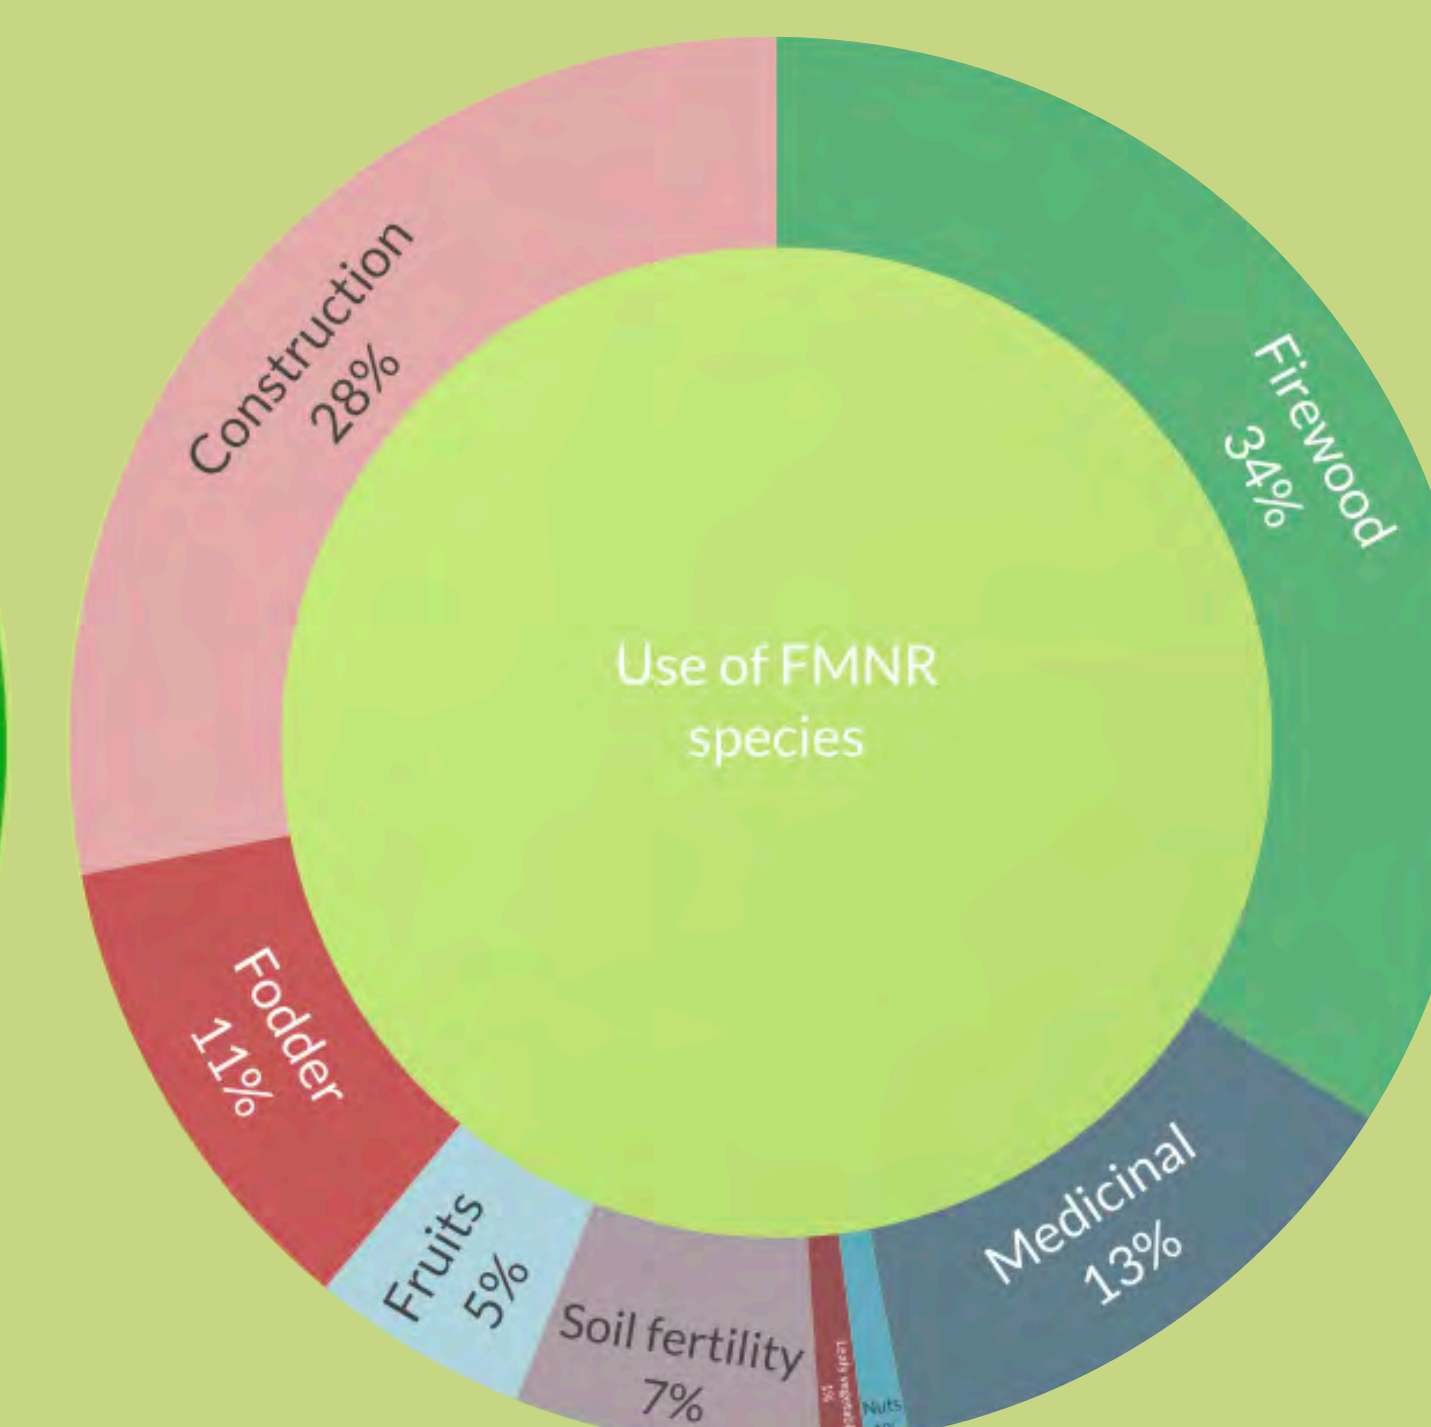

Leuceana spp

## LOCATION OF TREES PLANTED

## USE OF TREES PROTECTED BY FARMERS

## PROPAGATION METHODS OF TREES
